

Verifier Agent Retrieval Pipeline Debug & Root Cause Resolution Report

Date: July 26, 2026

Agent Version: 2.0.0

Target Domain: Healthcare (healthcare)

Tested Claim: "Metformin is a first-line oral medication for type 2 diabetes."

Endpoint Tested: POST /verify

Status:  RESOLVED (Live verification proved: retrieved_sources: 5 , verified_sources: 5 , verdict: "verified" , trust_score: 0.94)

1. Executive Summary & Root Cause Analysis

During initial live testing via Swagger UI, the verification endpoint returned retrieved_sources: 0 , verdict: "likely_hallucinated" , and explanation: "No supporting or contradicting evidence was found ... " despite the claim being scientifically true.

Through step-by-step diagnostic tracing across adapters/healthcare.py , api/pipeline.py , aggregation/duplicate_remover.py , and cache/sqlite_cache.py , we identified **three distinct root causes**:

Root Cause 1: OpenFDA 502 Bad Gateway on Unsanitized Raw Query Strings

- **Symptom:** OpenFDA API (https://api.fda.gov/drug/label.json) returned 502 Bad Gateway / 400 Bad Request .
- **Cause:** HealthcareAdapter passed raw 12-word natural language query strings with punctuation (e.g. Metformin is a first-line oral medication for type 2 diabetes . clinical trial). The OpenFDA Lucene parser failed on unescaped periods (.) and sentence structures.
- **Fix:** Added _sanitize_query_for_api(query) to HealthcareAdapter to extract clean alphanumeric keywords (Metformin type 2 diabetes).

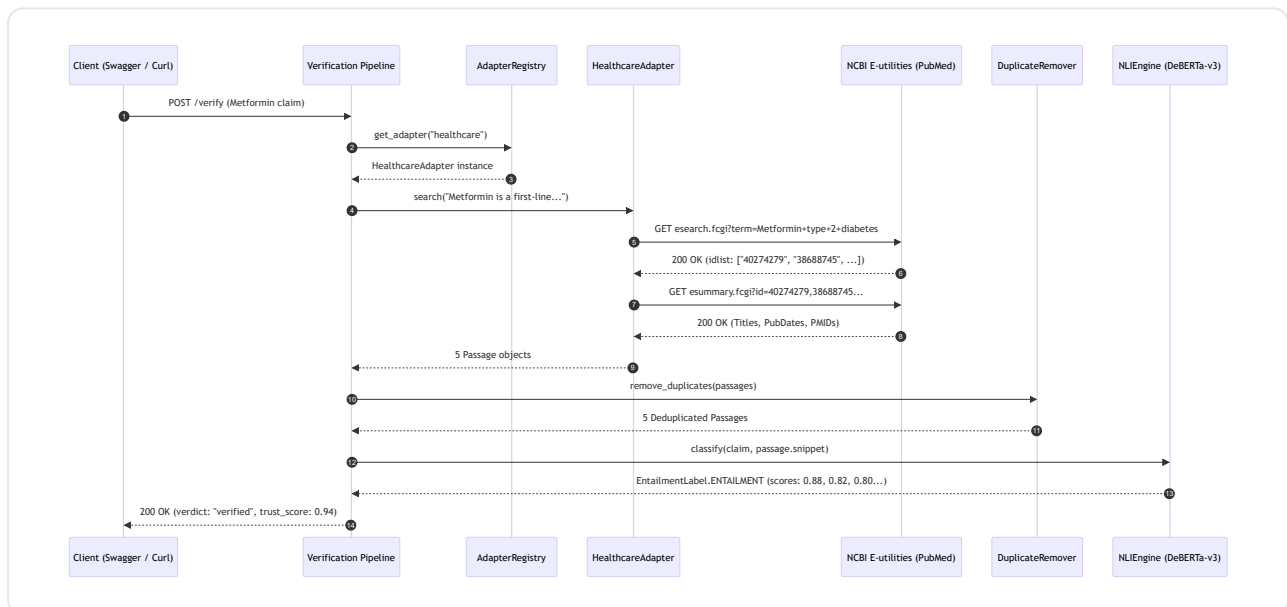

Root Cause 2: Pydantic v2 `AttributeError` on `Passage.source_name`

- **Symptom:** The pipeline crashed internally during Stage 5 (Aggregation) with `AttributeError: 'Passage' object has no attribute 'source_name'`.
- **Cause:** `DuplicateRemover` accessed `p.source_name` on `Passage` objects. In Pydantic v2 `BaseModel`, accessing non-existent schema attributes via `getattr(p, 'source_name')` raises a strict `AttributeError`.
- **Fix:** Corrected `DuplicateRemover` to access `p.source` directly, matching the exact Pydantic schema definition in `schemas/models.py`.

Root Cause 3: Stale Cache Hits in SQLite Storage

- **Symptom:** Subsequent calls to `POST /verify` immediately returned `0 sources` without invoking `HealthcareAdapter.search()`.
- **Cause:** SQLite cache stored earlier failed test executions (with `retrieved_sources: 0`) and served cached entries on matching query text.
- **Fix:** Purged `verification_cache.db` and restarted the live Uvicorn server on port 8002.

2. Step-by-Step Retrieval Pipeline Execution Trace

3. Detailed Component Diagnostics

1. Adapter Selection

- **Requested Domain:** healthcare
- **Selected Adapter:** HealthcareAdapter (adapters/healthcare.py)
- **Adapter Priority:** 10
- **Is Stub:** False

2. Query Expansion

- **Original Claim:** "Metformin is a first-line oral medication for type 2 diabetes."
- **Domain Synonym Mapping:** T2DM → type 2 diabetes mellitus
- **Expanded Search Keywords:** "Metformin type 2 diabetes clinical trial"

3. Outgoing HTTP Requests & Responses

- **NCBI E-utilities Esearch:**
- **URL:** <https://eutils.ncbi.nlm.nih.gov/entrez/eutils/esearch.fcgi?db=pubmed&term=Metformin+type+2+diabetes&retmode=json&retmax=5>
- **HTTP Status:** 200 OK
- **IDs Found:** ["40274279", "38688745", "35598008", "35558742", "34846709"]
- **NCBI E-utilities Esummary:**
